

WHO WE ARE?

Respect Service Integrity

We deliver innovative, efficient and value added integrated business, technology and process solutions by executing the highest level of business ethics and integrity. Surtel agility helps create long term sustainability for our stakeholders, by providing exemplary talent and customer service.

Comprehensive ERP Expertise

Our ERP teams include highly qualified professionals skilled in all phases of ERP implementation, including Planning and Design, Data Conversion/Migration, Development and Testing, Database Analysis and Database Performance Enhancement.

Functional Business Analysis

Surtel has a comprehensive understanding of the business processes involved and has proven Business-Analysis capabilities to pinpoint and eliminate obstacles that affect organizational efficiency and profitability.

Specialized Solutions

Surtel provides all levels of expertise required, ranging from a supporting role in one particular technological area or business function to complete project management. We also customize packaged ERP solutions to give the client a unique competitive advantage.

An Enterprise Perspective

An ERP solution will be less effective if it is not implemented with an enterprise perspective. Surtel analyzes how each functional ERP module will impact the organization, formulates plans to meet desired objectives and communicates necessary changes throughout the organization. This strategic approach also extends to the creation of any new business model that may be required.
